

AppleShare

Features

Powerful file and print services

- Lets users store their files and applications in a single, central location
- Makes it easy and efficient to print documents to networked printers
- Provides comprehensive, easy-to-implement security

Ease of use

- Installs with a single click of the mouse
- Can be up and running in minutes
- Makes day-to-day management quick and easy
- Users can take advantage of file and print

AppleShare is high-performance, easy-to-use file and print sharing software that allows networked Macintosh and Microsoft Windows software-based computers to share files, applications, and printers.

With AppleShare file server software, organizations can store all of their shared files and applications in a single, central location, providing convenient, easy access to every user on the local area network. By allowing networked users to centralize all key files and applications for easy sharing, AppleShare improves everyone's productivity. It eliminates time spent looking for files, worrying about misplaced documents, and determining the file or applica-

Windows software-based computers users via the Windows interface. AppleShare's network architecture coexists with other application programs and networking services such as Novell NetWare, Windows for Workgroups, and even the Internet.

Yet for all of its power and capabilities, AppleShare is extremely reliable and easy to set up, use, and maintain. It continues in the "plug and play" tradition established by the Macintosh more than a decade ago; most system administrators find that they can get an AppleShare server up and running within 15 minutes. And overall maintenance—including the addition and deletion of users—is so simple that a

AppleShare

Ordering and Licensing Information

AppleShare 3.0.1

Order No. M0090LL/B

AppleShare 4.0.2

Order No. M3995Z/A

AppleShare 4.1

(Included in some PowerPC-based Workgroup Server configurations)

AppleShare Client for Windows

Order No. M3481Z/A

(Also included in PowerPC processor-based Workgroup Server configurations; client network license is included and allows the installation of the client software on any Windows software-based PC on the network)

Product specifications are subject to change. Check with your Apple reseller for the most current information about product specifications and configurations.

AppleShare Product Family

AppleShare software comes in three versions that are designed to accommodate a variety of workgroup sizes and performance needs.

AppleShare 3.0.1 is designed for smaller

Product Details

Capabilities and services

- Includes file and print servers
- Supports Mac OS program linking and publish and subscribe
- Features an open environment that allows additional network services
- Macintosh client software built into every Macintosh; Windows client software sold separately

Sharing options

- On-line CD-ROM exchange
- Sharing of folders or entire disks
- Easy server selection through the Chooser
- Intuitive, consistent access to shared resources
- User-controlled access to information

Print spooling

- Provides spooling for up to five networked printers
- Offers centralized queue management
- Accepts simultaneous print requests
- Frees client workstations for use immediately
- Includes print log for up to 1,000 print jobs

Administrator control

- Administrator can set number of connected users
- Server messages can be broadcast or sent to selected users
- Administrator can set cache sizes to maximize performance

Security

- Minimum password length
- Password aging
- Password history to prevent immediate reuse
- Ability to disallow saved passwords
- Account disabled after specified number of password failures
- Adjustable time limit for temporary accounts
- Guest access allowed; turned off by default
- Copy-protection setting for documents
- "Lock" setting for folders
- Adjustable number of concurrent application launches
- Inherited folder privileges

How users view shared data:

-  Full access privileges
-  Drop folder, write capability only
-  No access privileges

How users protect their data:

-  Can't see enclosed folders
-  Can't see enclosed files
-  Can't write to folder
-  Can't write to or see folders
-  Can't write to or see files

Supported platforms

AppleShare Server

- AppleShare 3.0.1: 68030-based (or earlier) Macintosh computers
- AppleShare 4.0.2: 68040-based Macintosh computers*
- AppleShare 4.1: PowerPC processor-based Workgroup Servers

AppleShare Client

Macintosh

- An Apple Macintosh computer with an internal hard disk drive and at least 4MB of RAM
- Mac OS software version 6.0.7 or later
- System 7.5 required for performance of AppleShare 4.1

Windows

- Any IBM or 100 percent compatible computer running Intel processor 386 or greater; ISA, MicroChannel, VISA, and EISA internal buses; 4MB of RAM
- Windows 3.1, 3.11, or Windows for Workgroups 3.11 software
- MS-DOS 5.0 or later
- Ethernet network adapter card
- NDIS 2.0 or later
